

Replace the paragraph beginning at page 2, line 22, with:

A2 Also, in cases where a portable telephone capable of being connected with an internet system is used, a user can set the video-recording of a program outdoors. However, because the user is required to perform a pre-determined complicated operation, there is another problem that men and women of all ages have considerable difficulty in operating the portable telephone.

# IN THE CLAIMS

Replace the existing claims with:

R1.126 15.  
1. A portable apparatus comprising:  
inputting means for inputting operation information;  
transmitting means for transmitting the operation information input by the  
inputting means to a central processing unit;  
receiving means for receiving a remote controller control instruction  
corresponding to the operation information in cases where the central processing unit  
refers to a data base in which a plurality of remote controller control instructions are  
stored, and sends back the remote controller control instruction corresponding to the  
operation information; and  
control means for controlling an operated apparatus according to the remote  
controller control instruction received by the receiving means.

R1.126 16.  
2. The portable apparatus according to claim 1<sup>15</sup>, wherein a voice emitted from a  
user is input as the operation information to the inputting means.

R1.126 17.  
3. The portable apparatus according to claim 1<sup>15</sup>, wherein a moving picture  
indicating a gesture of a user is input as the operation information to the inputting means.

R1.126 18.  
4. The portable apparatus according to claim 1<sup>15</sup>, wherein one of a letter and a  
symbol written by a user is input as the operation information to the inputting means.

R1.126 19. The portable apparatus according to claim <sup>15</sup>1, wherein code information indicating one of letters and symbols is input as the operation information to the inputting means.

R1.126 20. The portable apparatus according to claim <sup>15</sup>1, wherein an external power measured by an acceleration sensor is input as the operation information to the inputting means.

R1.126 21. The portable apparatus according to claim <sup>15</sup>1, wherein environment information measured by an environment sensor is input as the operation information to the inputting means.

A3  
Cont  
R1.126 22. The remote control system according to claim 8, wherein the central processing unit performs an ambiguous retrieval process, in cases where no remote controller control instruction corresponding to the operation information exists, and sends back a remote controller control instruction most suitable for the operation information.

R1.126 23. The remote control system according to claim <sup>22</sup>9, wherein the central processing unit learns a correspondence relationship between the operation information and the remote controller control instruction most suitable for the operation information and sends back the remote controller control instruction without performing the ambiguous retrieval processing when the central processing unit receives identical operation information on a subsequent occasion.

R1.126 24. The remote control system according to claim 8, wherein the central processing unit specifies a user of the portable apparatus in cases where the central processing unit has a data base of each of a plurality of users, the central processing unit refers to the data base of the user, and the central processing unit retrieves the remote controller control instruction corresponding to the operation information.
